

IAP9 Rec'd PCT/PTO 15 DEC 2005

- 1. A method for managing access to a plurality of mobile data devices connected to a network using an intermediate system; said method comprising the steps
 - a. registering a plurality of mobile data devices, each of said plurality of mobile data devices for provision of data therefrom, and being in communication with said intermediate system via said network;
 - b. generating a list of available mobile data devices in said intermediate system;
 - c. receiving a data request from a data requestor; and
 - d. providing a data response.

(:

- 2. The method in accordance with claim 1, wherein said step a. further comprises the steps:
 - i. entering registration data of said plurality of mobile data devices;
 - ii. verifying said registration data of said plurality of mobile data devices; and
 - iii. adding said plurality of mobile data devices to said list of available mobile data devices.
- 3. The method in accordance with claim 2, wherein said step i. may be performed over the Internet by having an online form.
- 4. The method in accordance with claim 2, wherein said step i. may be performed over the mobile network through a WAP-based form.
- 5. The method in accordance with claim 2, wherein said step i. may be performed over the mobile network through interactive SMS.
- 6. The method in accordance with claim 2, wherein said registration data further comprises a unique name assigned to each mobile data device identifier of each of said plurality of mobile data devices.
